

Critical Skills and Practice

Tutorial 5 - Learning Something New

1 Introduction (5 minutes)

Your tutor will check in on how things are going.

2 Think of Something New (5 minutes)

Go through your plan and identify a task that would involve learning something new. This could be something directly related to the course, such as digging into something introduced during the lecture, or entirely separate, such as learning a new programming language.

3 Phone a Friend (10 minutes)

Turn and talk with a partner. You should spend five minutes finding resources online for each of the things you would like to learn. *Avoid using Generative AI at this point.* Go through different resources and figure out what would and would not be reliable/helpful, and why.

4 Resource Sharing (5 minutes)

If anyone found anything you think would be helpful to those with similar goals, or encountered a particularly unhelpful/deceptive source, this is a time to share with the rest of the class.

5 Learning the New Thing (20 minutes)

The remaining time in class will be spent trying to learn the new thing using the resources you identified.

6 Closing (5 minutes)

Time to ask questions.

Bring one of your reflections to the tutorial next week. You will be sharing this with a peer and giving/receiving feedback.
