

outline

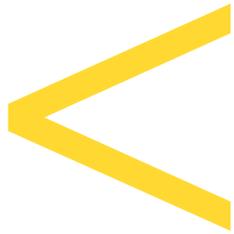

- Early ideation and the different phases
- Divergent thinking
- Convergent thinking

what is ideation?

what is ideation?

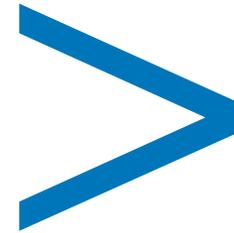

- Generating as many ideas as possible – for a given design brief
- Goal: To up with lots of new ideas that you did not have initially
- Then narrow down, refine those considered best, and iterate

what is ideation?

Divergent thinking

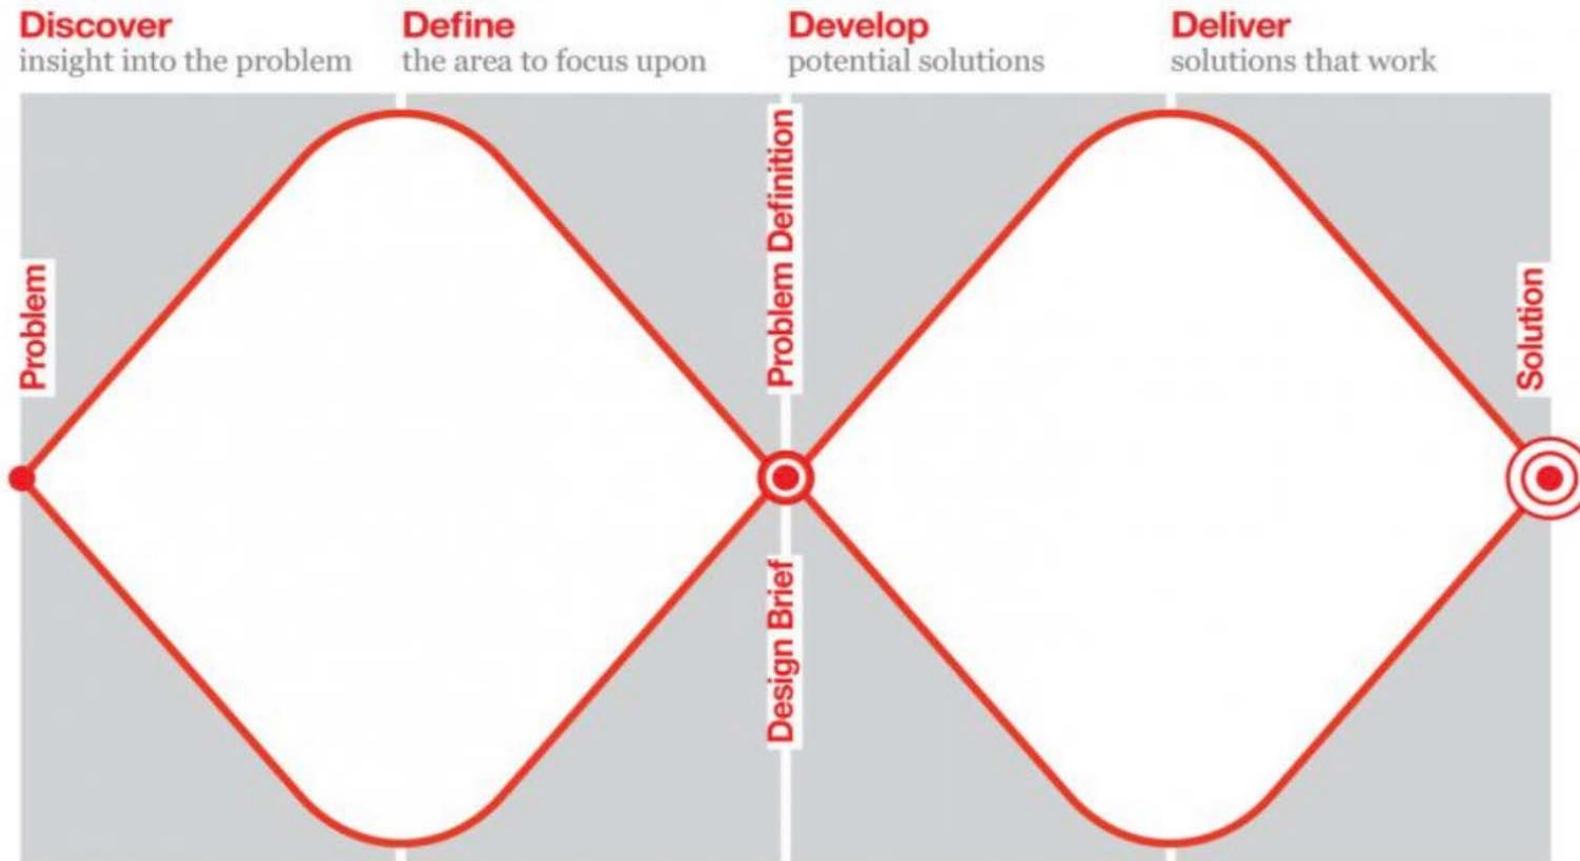

Many possible solutions

Convergent thinking

Developing a “good” solution

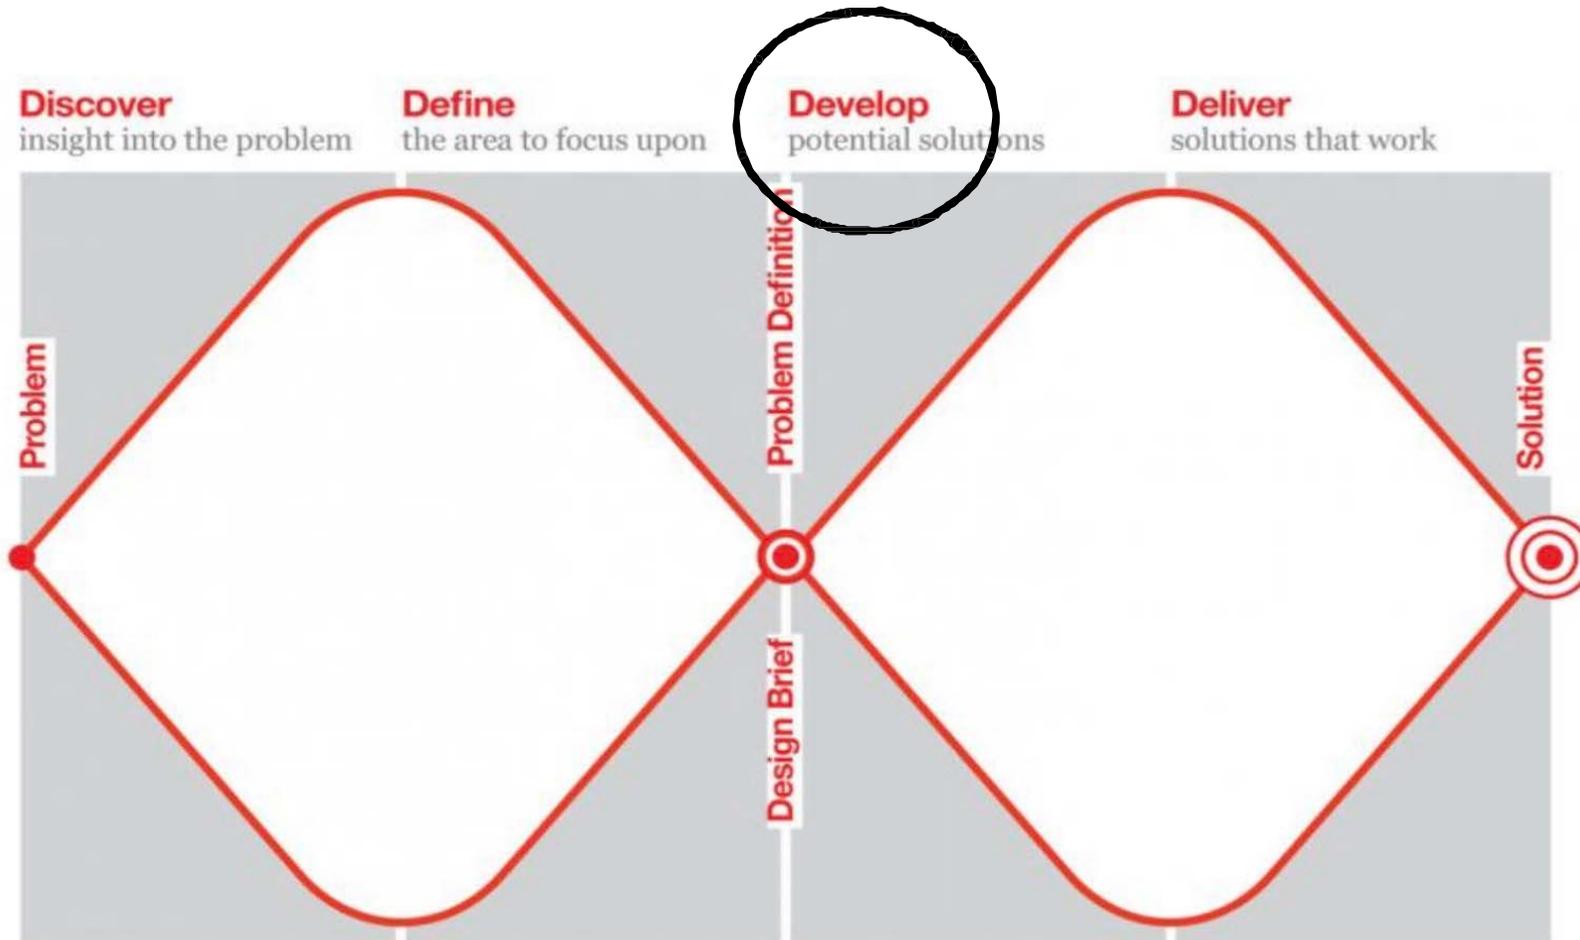

when do we need ideation?

British Design Council, 2004: The Double Diamond

<https://www.designcouncil.org.uk/our-work/news-opinion/double-diamond-universally-accepted-depiction-design-process>

when do we need ideation?

British Design Council, 2004: The Double Diamond

<https://www.designcouncil.org.uk/our-work/news-opinion/double-diamond-universally-accepted-depiction-design-process>

what is the value of ideation methods?

- You might gravitate towards (and get “stuck” on) an “obvious” idea
- Sometimes difficult to come up with more than a few ideas - especially without a set process/method in place

→ Ideation is all about getting you to think outside the box

how might we ideate?

**Preparing for
ideation**

**Divergent
thinking**

**Convergent
thinking**

**Preparing for
ideation**

what should we have done before ideating?

what should we have done before ideating?

- Know what problem you are addressing!
- Understand the context and reason for the problem
- Know who your stakeholders and users are
- Understand what their needs and wants are

**Preparing for
Ideation**

what should we have done before ideating?

- Understand the context and reason for the problem

Floor scrubbing robots were introduced at the airport in the wake of the Covid-19 pandemic. While initially, these robots were intended to be used in times of low foot-traffic, which was the case during the pandemic, over time they've been increasingly used during busy times. This has been leading to increased malfunctioning of the robots, which has had profound effects on janitorial staff's work. There have also been frustrations with how malfunctions are managed and janitorial staff feel that the current processes are further impacting and slowing down their work.

Derived from research by: Kang, Esther. Y., & Fox, Sarah. E. (2022, June).
Stories from the Frontline: Recuperating Essential Worker Accounts of AI Integration.
In *Designing Interactive Systems Conference* (pp. 58-70).

**Preparing for
Ideation**

what should we have done before ideating?

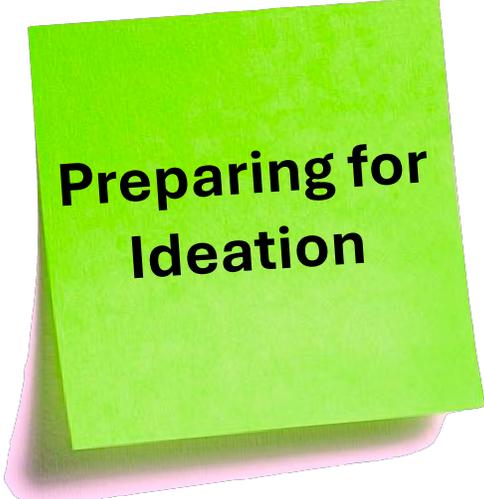

- Know who your stakeholders are
 - Janitorial staff
 - Managers and shift supervisors
 - County Authority (makes executive decisions)
 - Engineers from Northfield Robotics
- Know what their needs/wants are
 - Janitorial staff need to feel that their voices and insights are heard by decision makers
 - Administrators would like a clearer line of communication with Northfield Robotics to anticipate robots' changes in behaviour and routes
 - ...

**Preparing for
Ideation**

distilling the problem

- Your research may reveal many possible problems or design briefs
- For ideation, it is important to narrow it down to the problem you actually want to address

**Preparing for
Ideation**

”how might we...” questions

- One approach to narrow down the problem
- Questions to focus ideation, based on the problem in focus
- How might we...
 - Design technology that supports the work of janitorial staff?
 - Support better communication between janitorial staff and administrative staff?
 - Make the management of robot malfunctions quick and easy?

**Preparing for
Ideation**

”how might we...” questions

- How might we...
 - Design technology that supports the work of janitorial staff?
 - Support better communication between janitorial staff and administrative staff?
 - Make the management of robot malfunctions quick and easy?
- Each question should afford different ideas, different forms of design

**Preparing for
Ideation**

”how might we...” questions

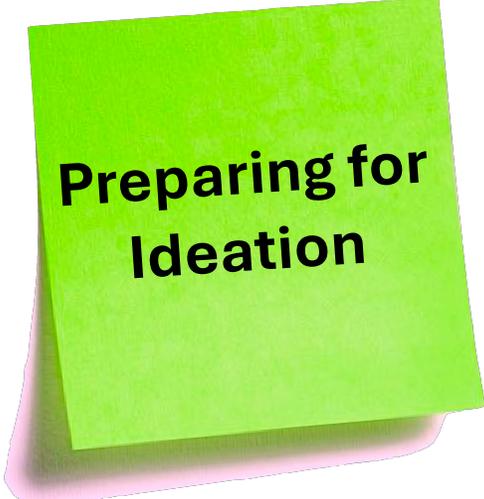

- How might we...
 - Design technology that supports the work of janitorial staff?
 - Support better communication between janitorial staff and administrative staff?
 - Make the management of robot malfunctions quick and easy?
- Each question should afford different ideas, different forms of design
- Questions should be broad enough to inspire creativity, rather than point to specific solutions already

Preparing for
Ideation

”how might we...” questions

- How might we...
 - Design technology that supports the work of janitorial staff?
 - Support better communication between janitorial staff and administrative staff?
 - Make the management of robot malfunctions quick and easy?
- Negative example
 - How might we create an app that tells administrative staff when a robot has malfunctioned?

**Preparing for
Ideation**

Activity "how might we..." questions [5min]

- Develop 3 "how might we..." questions based on (early) results of your "do", "say", "make" methods
- Examples: How might we...
 - .. design technology that supports the work of janitorial staff?
 - Support better communication between janitorial staff and administrative staff?
 - Make the management of robot malfunctions quick and easy?
- Each question should afford different ideas
- Questions should be broad to inspire creativity, rather than point to specific solutions already

**Preparing for
Ideation**

Activity "how might we..." questions [3min]

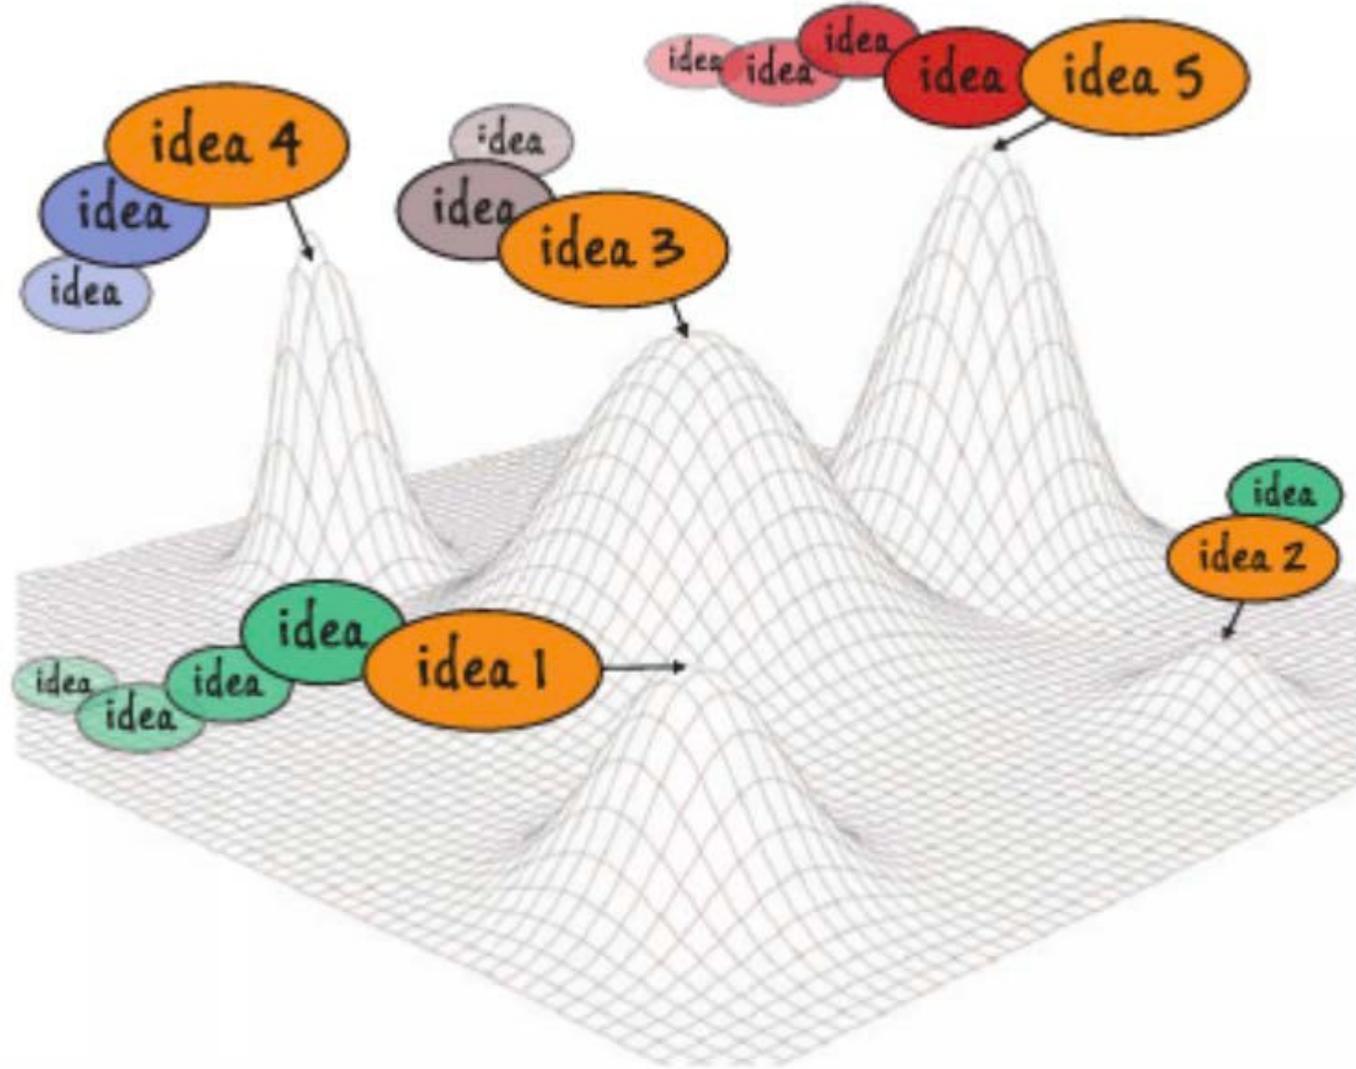

- Discuss the questions within your project group
- Decide on one question to move forward with OR develop a new one together – you will use this in the next activity!

**Preparing for
Ideation**

**Divergent
thinking**

what are the goals of (early) ideation?

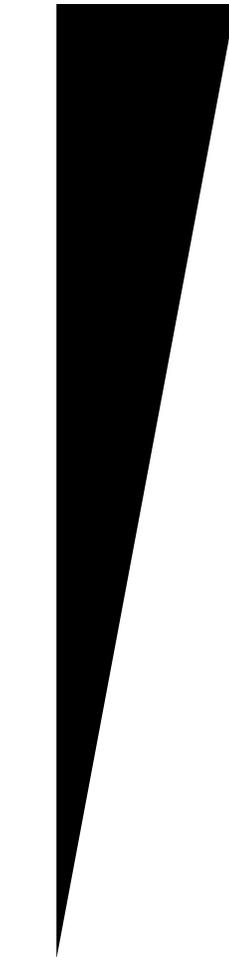

- Quantity > Quality
- Diversity
- Novelty over relevance
- Going beyond the obvious
- Wild ideas welcome
- High level thinking - no details

ideation methods

- Brainstorming
- Mindmaps
- Crazy 8s
- Crowdstorming
- Metaphors
- Sketching
- Mash-ups
- Storyboards
- ... Many more

Generative

Iterative

ideation methods

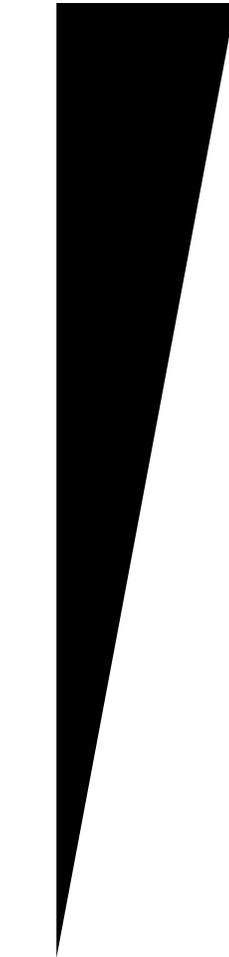

- All these are about coming up with ideas
- All give the ideation a few simple rules to help it along, e.g.,
 - Time limits
 - Promoting discussion (e.g., active listening, using ‘yes and?’)
 - Helping you connect ideas together (e.g., connecting ideas physically)

ideation methods

- Brainstorming
- Mindmaps
- Crazy 8s
- Crowdstorming
- Metaphors
- Sketching
- Mash-ups
- Storyboards
- ... Many more

Generative

Iterative

brainstorming

Divergent thinking

brainstorming rules

- Typically has a time limit
- Can be done individually and/or in groups
- Ground rules
 - Don't be judgmental - let ideas flow
 - Encourage wild ideas
 - Build on the ideas of others
 - One conversation at a time
 - Be visual (include sketches)
 - Go for quantity

brainstorming pros & cons

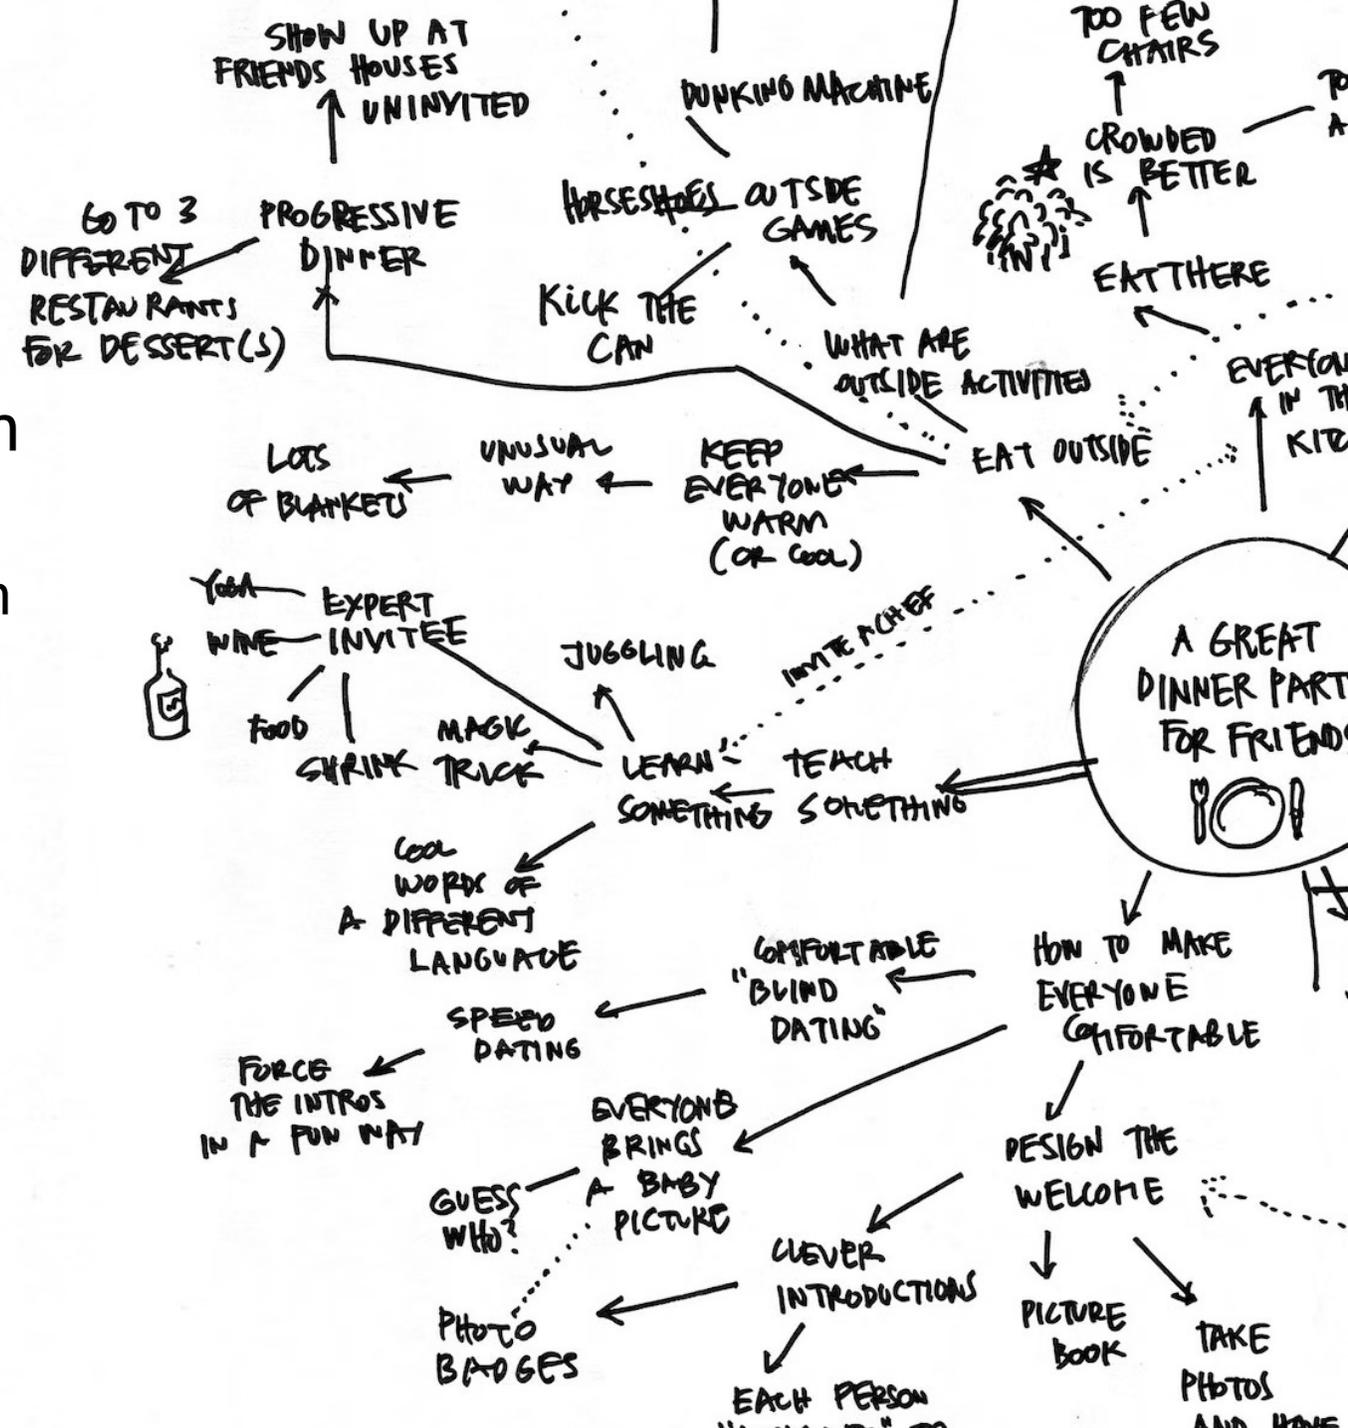

- Pros
 - Highly generative
 - Enables group discussion and re-framing the problem together
- Cons
 - Not everyone always contribute
 - Some people might dominate the discussion
 - Sometimes the ideas that come out are not very individual

**Divergent
thinking**

mindmapping

- Begin with the main concept in the middle
 - e.g., a “How Might We” question
- Add branches with high-level thoughts on the main concept
- Expand each branch with new nodes, and add new branches
- Add connections between different themes

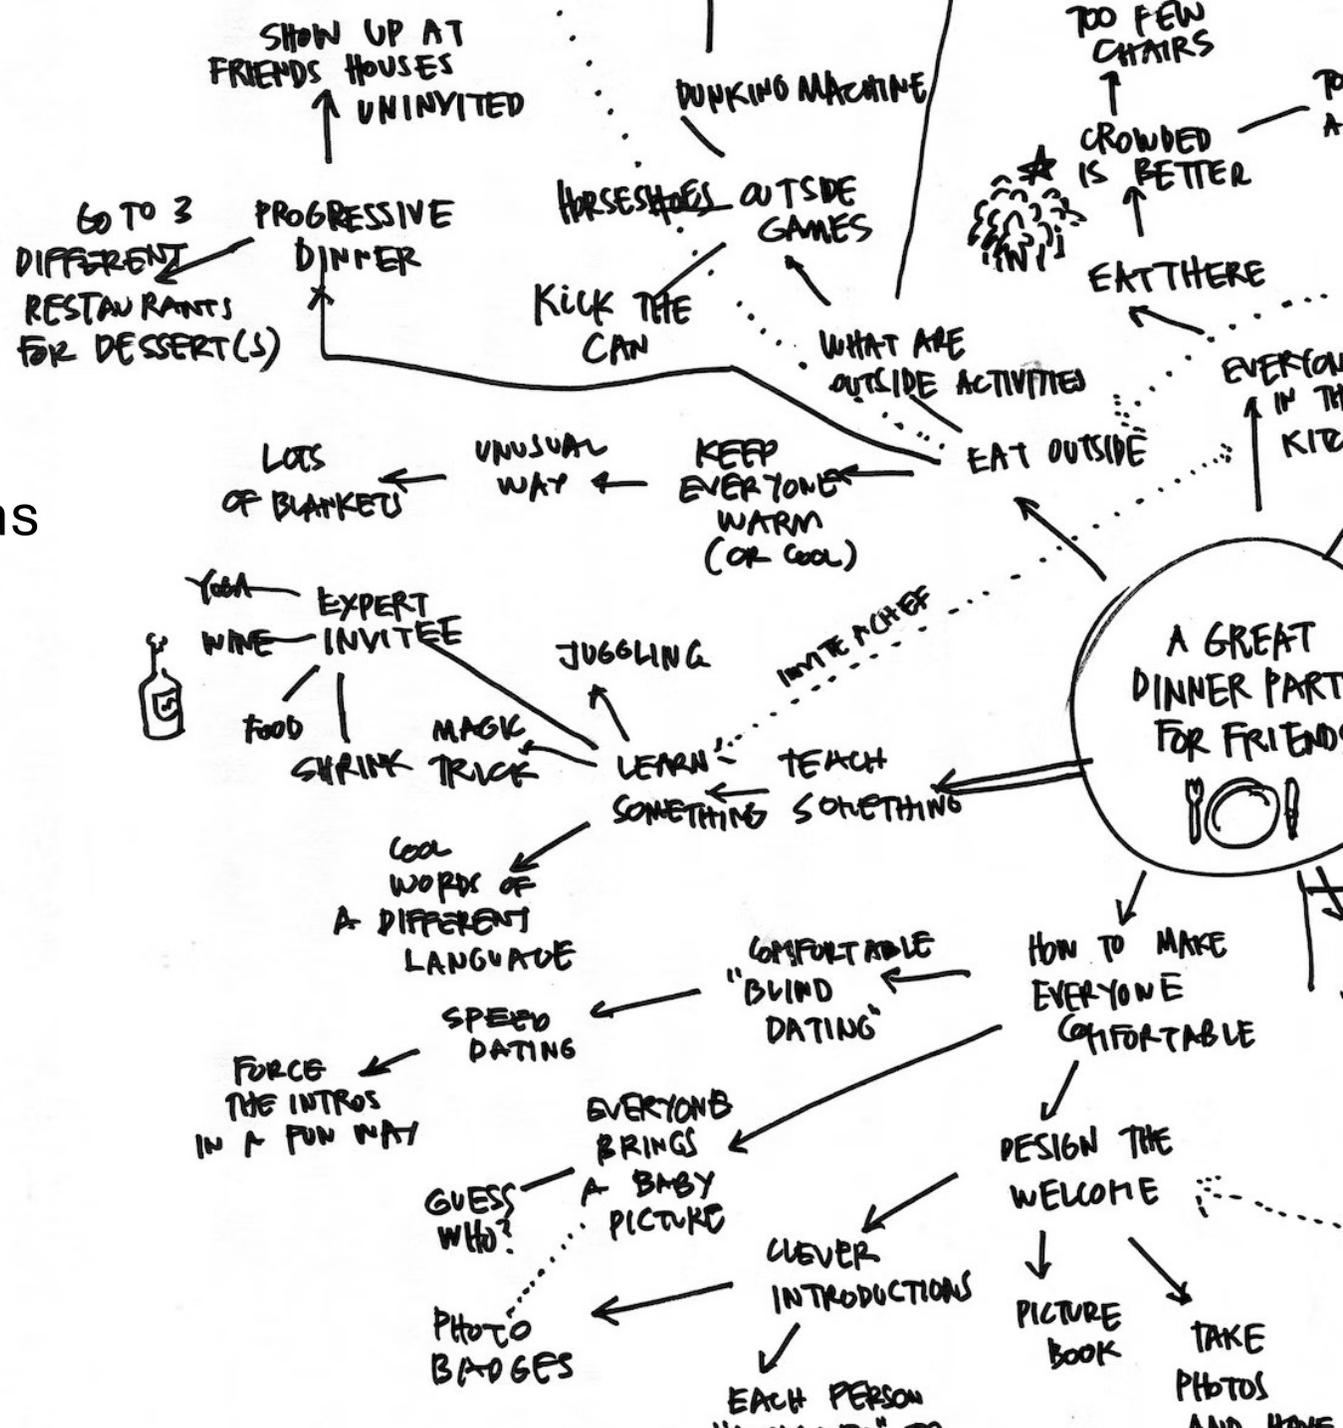

mindmapping

- Pros

- Very easy to expand concepts (as opposed to brainstorming)
- Make connections during the ideation session

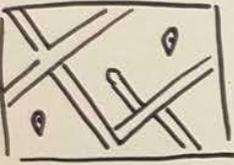

- Cons

- Can be a bit messy and hard to decipher
- Easy to get stuck on one branch

crazy 8s

①
waze for fraud alert

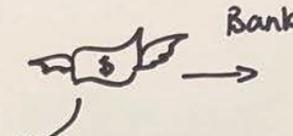

A hand-drawn diagram of a map with a route and a location marker.

②

Create an item network

**Divergent
thinking**

crazy 8s

- Fold your piece of paper three times
- Draw 8 ideas in 8 minutes
 - 1 minute to draw each idea
- Try to get something down on the page every time
- Don't overthink it
- Each concept has to be distinct

**Divergent
thinking**

Activity crazy 8s

[2+8min]

- Fold your paper 3 times; unfold again
- Write your “How Might We...” question at the top of your paper
- Sketch 8 ideas in 8 minutes – 1 idea per minute
- Try to get something down on the page every time
- Don’t overthink it!
- Each concept has to be distinct
- You can think about websites, apps, tangible interfaces, blockchain applications, teddy bears, letters...
- The sky is the limit!

**Divergent
thinking**

Activity crazy 8s

[5min]

- Explain at least 2 ideas to your group

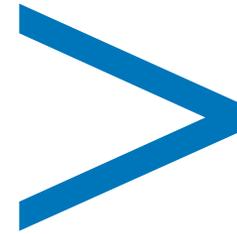

**Divergent
thinking**

how do we refine and narrow down?

Divergent thinking

Many possible solutions

Convergent thinking

Developing a “good” solution

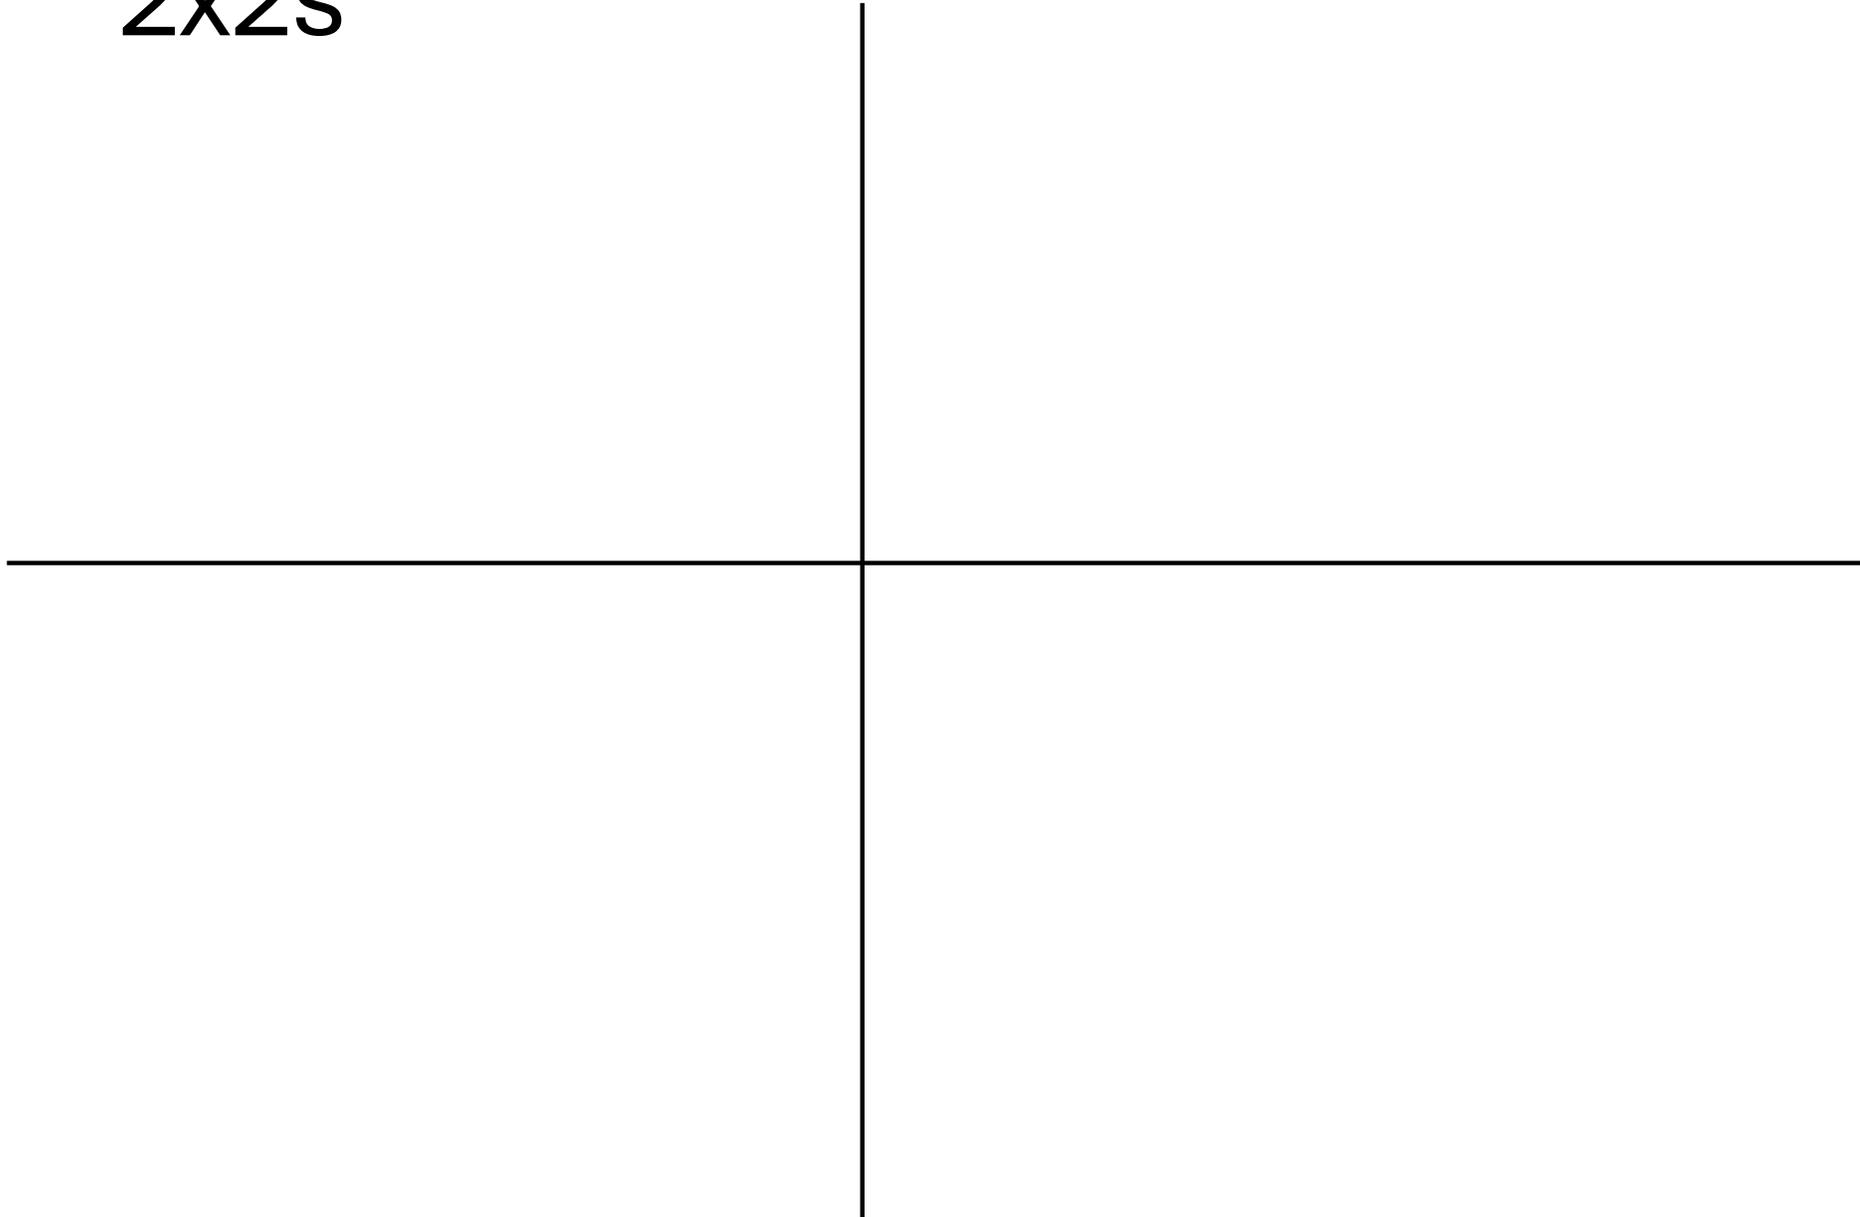

determining fit, ranking, and clustering

voting

Round 1	<p>Add an Android version</p> <p>Yang's first idea</p>	<p>Add a social element to the app</p> <p>Oscar's first idea</p>	<p>Have a section that helps gym goers find a gym buddy</p> <p>Rachel's first idea</p>	<p>Location tracking, tells you how long you spend at the gym automatically</p>	<p>Have a leaderboard for people who have set gym records</p>	<p>I think it would be important to make the gym a judge free zone. Maybe we can help with that in the app?</p>
Round 2	<p>Provide an incentive if they download the app</p>	<p>Users can post pictures and videos so other gym members can see them</p> <p>Yang's idea after reading Oscar's idea</p>	<p>A lot of people go to the gym to meet people, maybe there could be a way to have your profile public</p> <p>Oscar's idea after reading Rachel's idea</p>	<p>Phones can track how many steps you take</p> <p>Rachel's idea after reading Preston's idea</p>	<p>Let's just require members to get the app</p>	<p>We could fine anyone that participates in body shaming</p>
Round 3	<p>Rewards program</p>	<p>Users can post comments/like on Instagram and Facebook</p>	<p>Have a QR code scanner feature for people to add friends to their gym network</p> <p>Yang's idea after considering the ideas above</p>	<p>Have a news feed with announcements</p> <p>Oscar's idea after considering the ideas above</p>	<p>An option to send a video of lifting weights to a trainer to get help on improving form</p>	<p>Gym-rat free zone!</p>
Round 4	<p>Referral program</p>	<p>App users should be able to share music and playlists they like</p>	<p>Each treadmill should have a QR scanner that scan your app to do something</p>	<p>Have a "Member Moment" with gym members</p>	<p>Create a technology that virtually gives feedback in real time using a phone's front-facing camera</p>	<p>There needs to be a better way to collect member's data</p>

affinity mapping

combining ideas

- How might we address post-natal chronic back pain?

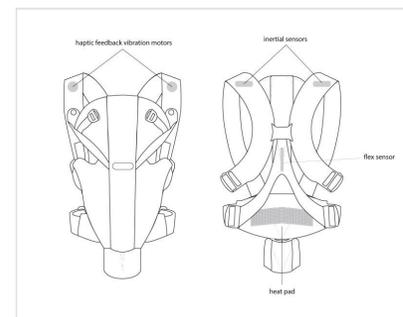

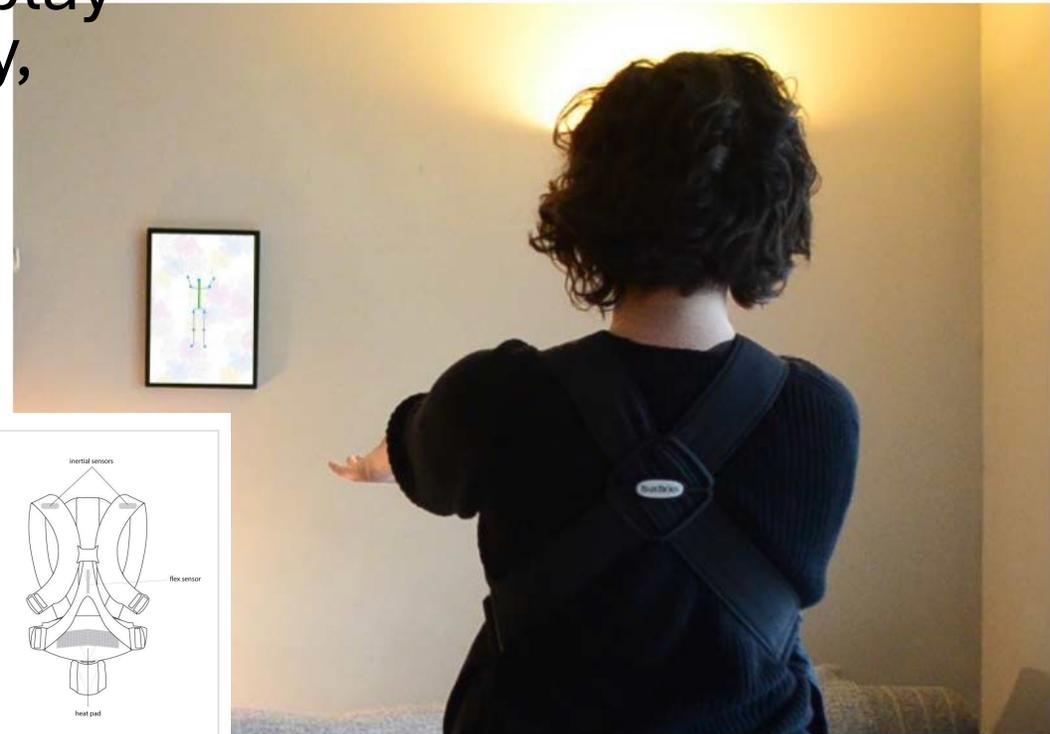

A wearable baby carrier with posture sensors and a heating pad for providing symptom relief

An ergonomic backpack with sensors for monitoring posture and avoiding excess weight

A physical in-home visualization device tracking progress in exercise and pain symptoms, to encourage long-term treatment

combining ideas

- Baby carrier with sensors that monitor for spine movements that exacerbate PNCBP
- Connected by Bluetooth to a digital display that guides users through physiotherapy, also using the sensors

Di Cuia, D., Janovica, J., Lechelt, Z., Li, S., & Purewal, H. (2016). CarryLine: A Tool for Management and Rehabilitation of Post-Natal Chronic Back Pain. In *Proceedings of the CHI'16* (pp. 26-31).
